

---

## Education

2013-Present **Master of Philosophy**, *Department of Computer Science and Engineering*, the Chinese University of Hong Kong, GPA: 3.788/4.0.

Supervised by Prof. James Cheng

2009-2013 **Bachelor of Engineering**, *School of Computer Science and Technology*, Harbin Institute of Technology, China, Major GPA: 87.1/100.0.

---

## Research Interests

Distributed Graph Computing System Design and Implementation

Database and Graph Data Management

---

## Publications

---

## Internship

- July, 2014 – **Data Mining Research Intern**, *Alibaba Group*, Hangzhou, China.
- August, 2014 Worked on large scale graph analytics problems in the Search and Recommendation Research Group. Pregel+ system was deployed to conduct large scale graph analytics algorithms.
- July, 2012 – **Research Intern**, *Microsoft Research Asia*, Beijing, China.
- May, 2013 Mentors: Dr. Xiaohua Liu (Researcher) and Dr. Ming Zhou (Principal Researcher)  
Worked on people search and entity linking in the Natural Language Computing Group.

---

## Projects

I focus on algorithm design and system implementation for large-scale graph computing. I am the core developer of the following projects.

Blogel <http://www.cse.cuhk.edu.hk/blogel/>

Accepted by **PVLDB 14**

It is a block-centric framework, which naturally handles all the three adverse graph characteristics, (1)skewed degree distribution, (2)large diameter, and (3)(relatively) high density. Blogel programmers may think like a block and develop efficient algorithms for various graph problems. Our experiments on large real-world graphs verified that Blogel is able to achieve orders of magnitude performance improvements over the state-of-the-art distributed graph computing systems.

Pregel+ <http://www.cse.cuhk.edu.hk/pregelplus/>

Accepted by **PVLDB 15**

Two effective message reduction techniques: (1)vertex mirroring and (2)a new request-respond paradigm are proposed in Pregel+, which can handle the communication bottleneck and the corresponding imbalanced workload of the original Pregel-like systems. Extensive experiments over various large real graphs show that Pregel+ is significantly more efficient than the state-of-the-art graph computing systems, especially for processing power-law graphs and (relatively) dense graphs.

---

## Teaching Experience

- 2014 - 2015 Introduction to Database Systems, Advanced Topics in Database Systems
- 2013 - 2014 Data Structures, Introduction to Discrete Mathematics and Algorithms
- 2010 C Programming Language, Advanced Programming Language in C++

---

## External Review

KDD 2014, PVLDB 2014, ICDE 2015

---

## Awards

- 2013 – 2015 CUHK Postgraduate Studentship
- 2012 **First Prize in Province**, China Undergraduate Mathematical Contest in Modeling
- 2012 **Silver Medal**, ACM-ICPC Asia Jinhua Regional Invitational Contest
- 2011 **Silver Medal**, ACM-ICPC Asia Chengdu Regional Contest
- 2011 **Gold Medal**, ACM-ICPC China Northeast Multi-Provincial Programming Contest
- 2010 **First Class**, People's Scholarship

---

## Standardized Tests

- TOEFL Reading: 29, Listening: 28, Speaking: 23, Writing: 25. Total: 105
- GRE Verbal: 152 (53%), Quantitative: 166 (93%), Analytical Writing: 3.5 (35%)

---

## Skills

- Languages C/C++, C#, Java, Python, Scala
- Systems Hadoop, Giraph, GraphLab, GraphChi, Spark
- Tools Git, OpenMPI
